FEATURES & BENEFITS

Multi-Shelf Cooking

Our AeroTech™ system circulates heat evenly for a consistent temperature throughout the cavity, helping you achieve perfect results even when using multiple shelves.

Quality And Durability

Every detail has been carefully crafted. The solid, perfectly balanced soft-close door, durable cooktop and glowing halo dials all add up to a premium freestanding cooker.

Power & Control

Instant and immediate control from the highest to the gentlest heat. The finely tuned cooktop controls let you sear, stir fry or simmer a delicate sauce to perfection.

Easy To Clean

Cleaning up spills is effortless. Your cooktop simply needs a quick wipe to keep it looking good as new. The pyrolytic self-clean oven cycle breaks down food residue at a very high temperature, leaving a light ash that's easily removed with a damp cloth.

Even Heat

Accurate, electronically controlled oven heat ensures a great result every time.

Large Capacity Oven

The generous 140L total capacity oven gives you plenty of space to cook multiple dishes at once.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
