12" Series 7 2 Zone Induction Cooktop, with SmartZone

Series 7 | Minimal

Black Glass

This Series 7 cooktop is a joy to use, with the instant response and energy efficiency of induction technology.

- Immediate heat response and extremely accurate temperature control
- Child and pet safe cooktop remains cool to touch until a pot or pan is placed on the surface
- PowerBoost activates a very high heat, bringing liquid to boil in less than a minute

• Easily control each cook zone with Touch&Slide, including pairing cook zones to create a large SmartZone

Height	2 3/4 "
Width	11 13/16 "
Depth	20 7/8 "

FEATURES & BENEFITS

Complementary Design

The subtle black glass and durable matte black detailing are designed to pair with the Minimal style Series 7 Ovens. With premium styling and detailing, these cooktops seamlessly blend with other appliances for a cohesive, considered kitchen design.

Enhanced Features

PowerBoost and GentleHeat deliver either very high or very low heat, fast. Perfect for specialized cooking tasks such as searing meat and melting chocolate. An integrated timer ensures a great result every time.

Instant Response

Go from a boil to a simmer in seconds. Touch&Slide controls react immediately when you adjust the temperature so you don't waste time in the kitchen.

Safer Choice

Induction cooktops only start heating your pot or pan once you've placed it on the ceramic surface and stop as soon as you remove it – so you don't have to worry about curious little fingers or leaving a cook surface on.

Easy Cleaning

The surface around your cookware stays cool when you cook – preventing baked-on spills and making cleaning up a breeze. The ceramic cooktop surface, including anodized detailing for durability, just needs a quick wipe after use to maintain its good looks.

Superior Efficiency

Less heat is wasted during induction cooking because only the cookware is heated, not the cooktop surface. This makes induction cooking more energy-efficient than electric or gas cooktops.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
