

# 36" Series 7 5 Burner Gas Cooktop, Natural Gas

Series 7 | Contemporary

Stainless Steel | Natural Gas

This large cooktop gives you plenty of room to move, and the cooking flexibility to get creative for a crowd.

- Five burners including a wok burner
- Auto re-ignition means if the flame goes out it will automatically re-light for safety

## DIMENSIONS

Height	2 5/16 "
Width	35 7/16 "
Depth	20 7/8 "

## FEATURES & BENEFITS

### Easy Handling

With flat cast iron grates, pots and pans can easily be slid across elements, coming in handy in busy cooking environments.

### Safe And Sound

The Auto-reignite system means you don't have to hold down a dial while burners ignite - if a burner goes out it is automatically relit at the original flame setting.

### Complementary Design

The brushed stainless steel and polished metal trim has been designed for durability but also provides a modern, stylish finish, matching the Fisher & Paykel family of kitchen appliances.

### Easy Cleaning

The stainless steel component is easily accessible and quick to clean. Cast iron trivets provide a durable and stable cooking platform. Their rubber feet prevent them from scratching the cooktop.

### Handy Accessories

This cooktop comes with a small pan support and wok stand to complement different cooking styles.

### Precise Control

Simply turn the dials to ignite the flame quickly and safely. Innovalve™ technology allows you to adjust the flame with 180° gas valve rotation for super accurate temperature control.

## SPECIFICATIONS

### Accessories (included)

Small pan support	•
Wok stand	true

### Burner ratings

Auxiliary burner (LPG)	700 - 3500BTU
Maximum burner power	Yes
Rapid burner (LPG)	1900 - 11500BTU
Semi-rapid burner (LPG)	1000 - 8500BTU

### Cleaning

Easy clean cooktop design	•
Quick component removal	•

### Controls

Ergonomic control dials	•
Laser etched graphics	•
Turned stainless dials	•

### Performance

Both LPG & NG models available	•
Electronic ignition	•
Quick connect gas valves	•

**Where applicable:**

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
