48" Series 9 DCS Grill with Infrared Sear Burner, LPG

Series 9

Stainless Steel | LPG

Taking your grilling experience to the next level, this Series 9 built-in 48" grill is the ultimate addition to premium outdoor kitchens.

- Infrared sear burner for incredibly fast searing up to 26 MJ/hr
- · Cater for a crowd with the secondary cooking surface
- Build into an outdoor bench, or add a cart for a freestanding grill
- U-burners deliver 26 MJ/hr total power per burner with precise heat control from 150°C to 600°C

DIMENSIONS

Height	692 mm
Width	1217 mm
Depth	682 mm

FEATURES & BENEFITS

The Perfect Sear

A dedicated searing zone with a dynamic infrared burner allows you to experience a new level of versatility, using a range of cooking methods. The improved dual rail design offers increased control and faster heating, so you can achieve the perfect sear every time.

Charcoal Smoker Tray

Enjoy a smoky barbecue flavour by cooking with charcoal – or add wood chips for extra smoke. Ignited instantly with in-built gas flame ignition, you can cook directly on the cooking grate. A W-shaped tray with adjustable vents helps the charcoal last longer.

Heavy-Duty Infrared Rotisserie

An infrared rotisserie burner provides controlled searing heat up to 19.5 MJ/hr. Perfect for entertaining, the heavy-duty motor can easily turn a 25kg load. The rotisserie rod is conveniently stored under the drip pan handle.

Intuitive Lighting

Brilliant 12-volt lighting safely illuminates the entire grilling surface when you open the lid. Ideal for night-time cooking, the bezel dial lighting glows white when the grill is on, and orange when the gas and grill are in use.

Easy-Lifting Hood

The hood can be opened using one hand for better access and visibility when cooking. You can easily accommodate larger food with extra space under the hood.

Extra Cooking Area

Effortlessly cook for a crowd with a secondary cooking space. You can fit a grill pan for slow cooking, roasting and making sauces, or to keep food warm after searing.

Grease Management System™

Our Grease Management System™ reduces flare-ups by channelling grease and oils away from the burner flames during grilling.

SPECIFICATIONS

Burner ratings	
Grill burners	25.5 MJ/h
Grill burners	25.5 MJ/h
Integrated rotisserie burner	19.5 MJ/h
Integrated rotisserie burner	19.5 MJ/h

Installation & User Guide Professional Grill

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
