

# 90cm Series 9 5 Burner Gas Cooktop, Flush Fit, LPG

Series 9 | Contemporary

Stainless Steel | LPG

Designed to fit flush into your kitchen benchtop, this large cooktop creates a seamless look and easy cleaning.

- With five burners including a wok burner
- A flame-failure safety device; if a flame goes out, the gas turns off

## DIMENSIONS

Height **76 mm**

Width **900 mm**  
Depth **530 mm**

## FEATURES & BENEFITS

### Fits Flush

The gas burners are recessed into the work surface, leaving the trivets flush and providing an integrated kitchen bench with a seamless look.

### Clever Cooking Results

The consistent flame and heat distribution of the dual flame wok burner, combined with highly responsive dials, offer precise heat adjustment that can perfect a slow simmer for sauces or an intense heat for searing steaks.

### Complementary Design

The brushed stainless steel has been designed for durability but also provides a modern, stylish finish, matching the Fisher & Paykel family of kitchen appliances.

### Safe And Sound

Intuitive dials glow red for on and white for off, showing from a distance which burners are lit. The flame failure safety device automatically turns off the gas if the flame is accidentally extinguished.

### Easy Cleaning

The stainless steel component is easily accessible and quick to clean. Cast iron trivets provide a durable and stable cooking platform, with rubber feet to prevent them from scratching the cooktop.

### Handy Accessories

This cooktop comes with a small pan support and wok stand to complement different cooking styles.

## SPECIFICATIONS

### Accessories (included)

Small pan support	•
Wok stand	true

### Burner ratings

**Where applicable:**

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
