- Convenient access to fresh, chilled water and ice with internal water dispenser and ice maker
- Spacious bottom freezer with full extension drawer gives easy access to frozen goods

## DIMENSIONS

Height	84 "
Width	35 3/4 "
Depth	24 "

## FEATURES & BENEFITS

### Variable Temperature Drawer

When it comes to optimal food preservation, one temperature does not fit all. Our Variable Temperature Drawer gives you full control over the way you care for food. At the touch of a button, transform the bottom refrigerator drawer to Chill, Fridge, or Pantry modes to best suit different types of food. Adjust the settings for everyday convenience, or switch modes to increase the chilling capacity, ideal for those special occasions.

### Clever Energy

Your refrigerator adapts to daily use by cooling and defrosting only when needed. This means it uses the energy it needs without compromising on food care.

### Activesmart™ Foodcare

ActiveSmart™ Foodcare learns how you live. It's technology which understands how you use your refrigerator and adjusts temperature, airflow and humidity inside to help keep food fresher for longer.

### Seamless Integration

These models fit flush, with only 3mm gaps around them and no visible hinges or grilles. Our Integrated models can be seamlessly hidden behind your cabinetry, or you can purchase our stainless steel door panel.

### Flexible Storage

Designed to make it simple for you to store, access and remove food, this large capacity refrigerator includes adjustable cantilevered shelving and full extension bins in the freezer.

### Internal Water And Ice Dispenser

Both the water dispenser and ice maker are located inside this integrated model, ensuring an uninterrupted exterior that blends seamlessly with adjacent cabinetry. The slimline water dispenser is flush-fit to maximise internal storage space. It boasts a temperature-controlled flow and an angled delivery to catch any drips or spills.

### Design Quality

The premium design and finish includes a steel interior lining as well as full extension metal shelf runners for easy access, robust glass shelving and drawers with quality hinges designed for daily use.

#### Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
