Series 9	Minimal
Black Glass	LPG

A powerful five burner with precision control and performance. Pair with any other appliance in our Minimal range.

- Large cooking area with five burners, including a wok burner and two semi rapid burners
- A timeless, minimal look to fit any kitchen style, with black ceramic glass cooking zones and a black trim.
- A flame-failure safety device; if the flame goes out, the gas turns off

• Removable cast iron trivets and ceramic glass that can be wiped down for easy cleaning

DIMENSIONS

Height	58 mm
Width	900 mm
Depth	530 mm

FEATURES & BENEFITS

Complementary Design

The subtle black glass, anodised trim, and black dials blend elegance with durability and are designed to match the Minimal style Series 9 ovens. With premium styling and detailing, these cooktops seamlessly blend with other appliances for a cohesive, considered kitchen design.

Precise Control

The consistent flame and heat distribution of the dual flame wok burner combined with the highly responsive dials offer precise heat adjustment that can perfect a slow simmer for sauces or an intense heat for searing steaks.

Easy Cleaning

Cleaning and care of these cooktops is easy with sealed burners and a single sheet cooking surface. After each use, simply remove the trivets and wipe down the glass.

Quality Materials

Featuring cast iron trivets, anodised metal dials, and hightemperature resistant ceramic glass, our cooktops are built with the finest materials for optimal performance.

Safe & Sound

The flame failure safety device automatically turns off the gas if the flame is accidentally extinguished.

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
