90cm Series 9 5 Burner Gas Hob, Natural Gas

Series 9 | Contemporary

Stainless Steel | Natural Gas

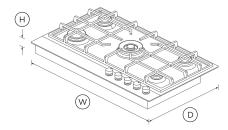

Designed to fit flush into your kitchen benchtop, this large hob creates a seamless look and easy cleaning.

- · A large cooking area with five burners, including a wok burner
- A flame-failure safety device; if a flame goes out, the gas turns off

DIMENSIONS

Height 76 mm

FEATURES & BENEFITS

Fits Flush

The gas burners are recessed into the work surface, leaving the trivets flush and providing an integrated kitchen bench with a seamless look.

Clever Cooking Results

The consistent flame and heat distribution of the dual flame wok burner, combined with highly responsive dials, offer precise heat adjustment that can perfect a slow simmer for sauces or an intense heat for searing steaks.

Complementary Design

The brushed stainless steel has been designed for durability but also provides a modern, stylish finish, matching the Fisher & Paykel family of kitchen appliances.

Safe And Sound

Intuitive dials glow red for on and white for off, showing from a distance which burners are lit. The flame failure safety device automatically turns off the gas if the flame is accidentally extinguished.

Easy Cleaning

The stainless steel component is easily accessible and quick to clean. Cast iron trivets provide a durable and stable cooking platform, with rubber feet to prevent them from scratching the hob.

Handy Accessories

This hob comes with a small pan support and wok stand to complement different cooking styles.

User Guide

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
