

# 90cm Series 5 Contemporary Oven, 9 Function

Series 5 | Contemporary

Stainless Steel

With contemporary styling and clean lines in glass and steel, this built-in oven complements the style and elegance of any modern kitchen.

- One of the largest built-in ovens on the market providing 100L total capacity
- Nine functions including Pastry Bake, Roast and Fan Forced

- Features AeroTech - a technology that circulates heat evenly, ideal for multi shelf cooking

## DIMENSIONS

|        |        |
|--------|--------|
| Height | 478 mm |
| Width  | 895 mm |
| Depth  | 564 mm |

## FEATURES & BENEFITS

### Cooking Flexibility

This built-in oven has nine functions with pre-set temperatures, including Bake, Pastry Bake and Fan Forced, allowing you to use a variety of cooking styles.

### Sized To Suit

Designed for multi-shelf cooking, this is one of the largest built-in ovens on the market providing 100L total capacity. The wide cavity allows for both side by side and multi-shelf cooking.

### Designed To Match

With their premium handle styling and stainless steel finish, our built-in ovens are designed to match the rest of Fisher & Paykel's kitchen appliance family.

### Pre-Set Oven Functions

Oven functions are pre-set at the touch of a dial and brilliant lighting combined with a large viewing window reduce the need to open the oven door, providing perfect cooking results and improving energy efficiency.

### Safe And Sound

The CoolTouch door with triple glazing and cooling system is safe to touch from the outside, protecting your hands and the surrounding cabinetry.

### Perfect Results

This built-in oven features AeroTech - a technology that circulates heat evenly throughout the entire internal cavity to eliminate cold spots and ensure perfect, even results when cooking on multiple shelves.

## SPECIFICATIONS

**Where applicable:**

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
