# 30" Series 9 Professional 5 Burner Dual Fuel Range, LPG

Series 9 | Professional

Stainless Steel | LPG

Make a statement in less space, with this powerful gas burner range and spacious convection oven.

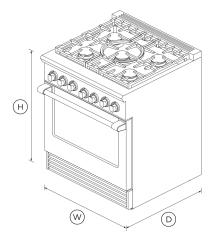

- · Top burner heat of 19,000 BTU, for seriously fast boiling
- Convection oven with 4 cu ft total capacity
- Non-tip full-extension shelves for safe removal of hot dishes

## **DIMENSIONS**

Height 35 3/4 - 36 3/4 "

Width 29 7/8 "

Depth 29 1/8 "

#### **FEATURES & BENEFITS**

#### **Cooktop Power**

Sealed Dual Flow Burners™ deliver cooktop power up to 23,500 BTU (NG models) for seriously fast boiling right down to a precise 140°F full surface simmer with the gentlest of flames.

#### **Total Control**

Precise control across high and low settings is delivered through the halo-illuminated cooktop dials. The ovens have true convection and electronic oven control for precise and consistent temperatures.

## Consistent broiling

The Dual Fuel Range broiler provides an even heat that covers a very large surface area — perfect for browning a fully loaded oven tray.

#### Easy to clean

The Dual Fuel Range oven has a self-cleaning function and removable side racks. The cooktop has sealed burners and an encapsulated cooking surface with a commercial-style stainless steel finish.

#### Instant Visibility

Control dials have halo-illumination glowing white - heating up; orange - temperature reached; red - self-cleaning mode. The oven is illuminated by two powerful incandescent lights.

## Cooking Flexibility

The cooktop is designed for easy access to any burner with grates you can smoothly slide pots across, while the oven cavity is large enough to allow you to cook multiple dishes at once.

## **SPECIFICATIONS**

### Accessories (sold separately)

| Square handle option | AH-R30 |
|----------------------|--------|
| Wok grate included   | Yes    |

#### **Burner ratings**

| Maximum burner power | 19000 BTU |

## Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
