# 30" Series 7 Professional Self-Cleaning Double Oven, 10 Function

Series 7 | Professional

Stainless Steel

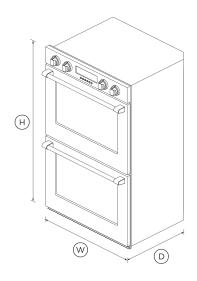

Choose maximum capacity, combining two independent ovens so you can cook multiple dishes simultaneously.

- 4.1 + 4.1 cu ft total capacity across two oven cavities
- 10 functions in each oven including Roast and Aero™ Pastry
- High-temperature self-cleaning function breaks down food residue for an easy clean

Non-tip, full-extension shelves for safe removal of hot dishes

# **DIMENSIONS**

Height 48 1/2 "
Width 29 3/4 "
Depth 23 5/16 "

## **FEATURES & BENEFITS**

## Cooking Flexibility

This built-in oven has 10 functions with pre-set temperatures, including Roast, Pastry Bake and Maxi Broil allowing you to use a variety of cooking styles.

#### Even Cooking

A digital microprocessor monitors the temperature to ensure precise heat and a four-way convection system creates even heat distribution throughout the oven, ideal for multi-shelf cooking.

#### Sized To Suit

This is one of the largest built-in ovens on the market providing 8.2 cu ft total capacity across two oven cavities allowing you to fit a large casserole dish, the family roast and a pie for dessert.

# Self Cleaning

The self-clean function breaks down food residue at a very high temperature, leaving a light ash that's easily removed with a damp cloth. For best results, wipe down the inside of your oven door before you use the self-clean function.

#### Information At A Glance

Halo illuminated dials provide information at a glance. White - heating up; orange - temperature is reached; red - self-cleaning mode. Three halogen lights and the large oven window creates excellent visibility of what's cooking.

## Safe And Sound

The CoolTouch door with triple glazing and cooling system is safe to touch from the outside, protecting your hands and the surrounding cabinetry.

# **SPECIFICATIONS**

## Accessories (included)

Full extension sliding shelves

5 sets

### Capacity

Shelf positions 8

Total capacity 8.2 cu ft

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
