Dual Fuel Range, 30", 4 Burners, Self-cleaning

Series 9 | Classic

Black

Get the best of both worlds with dual fuel. A gas cooktop with wok burner is paired with a convection oven with 9 functions.

- · Four burner gas cooktop with two dual wok burners
- Convection oven with 3.5 cu.ft total capacity and nine oven functions including Roast, Aero Pastry™ with pizza mode and rapid proof for baking bread
- Non-tip full-extension shelves for safe removal of hot dishes

 High-temperature self-cleaning function breaks down food residue for an easy clean

DIMENSIONS

Height 35 3/4 - 37 5/8 "

Width 29 7/8 "

Depth 25 1/4 "

FEATURES & BENEFITS

Multi-Shelf Cooking

Our AeroTech™ system circulates air evenly throughout the entire oven so dishes on the top shelf turn out just as perfect as food cooking on the bottom shelf.

Quality and durability

Every detail has been carefully crafted. The solid, perfectly balanced soft-close door, durable cooktop grates and glowing halo dials all add up to an exceptional, premium range.

Easy To Clean

Cleaning up spills is effortless. Your cooktop simply needs a quick wipe to keep it looking good as new. The self-clean function breaks down food residue at a very high temperature, leaving a light ash that's easily removed with a damp cloth.

Burner power & control

Instant and immediate control from the highest to the gentlest heat. The finely tuned cooktop controls let you sear, stir fry or simmer a delicate sauce to perfection.

Large Capacity Oven

The generous 3.5 cu.ft total capacity oven gives you plenty of space to cook multiple dishes at once, with enough room to fit a 26 lb turkey.

Even heat

Accurate, electronically-controlled oven heat ensures a great result every time.

SPECIFICATIONS

Accessories (included)

2-pc grill system (Broil pan and Grill rack)

Broil pan

Full extension telescopic shelves 2 sets (part 578776)

Small pot support 1 (part 533981 cast)

Accessories (sold separately)

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
