

Wall Rangehood, 60cm, Box Chimney

Series 7 | Contemporary

Stainless Steel and Glass

This Contemporary style rangehood extracts steam, grease and cooking odours quietly and efficiently.

- With three fan speeds plus boost, select the perfect extraction rate for your cooking
- Powerful maximum air movement of 780m³/hr
- Energy-efficient LED lighting to illuminate your cooking surface
- Wi-Fi enabled for notifications through the SmartHQ™ app

DIMENSIONS

Height	635-1035 mm
Width	598 mm
Depth	500 mm

FEATURES & BENEFITS

Effective Extraction

Featuring perimeter extraction, four fan speeds, and a boost function, this range hood provides powerful extraction to quickly remove odors and steam. Odours can linger in the kitchen well after cooking is finished so the timer keeps the hood working for up to 15 minutes before automatically turning off.

Simple Controls

The intuitive control panel responds to the touch of your finger. LED strip lighting illuminates the entire cooktop surface for the perfect sear or ideal reduction. Rangehood settings, including temperature and fan speed, can be controlled via the SmartHQ™ app, with additional voice control options for fan speeds and lighting.

Easy Cleaning

Designed for simple removal, the filters are easy to clean and dishwasher safe, while the glass and stainless steel finish is easily wiped clean. The SmartHQ™ app will notify you when to clean the filter to ensure you get the best performance out of your rangehood.

Complementary Design

The stainless steel finish of this vent hood will complement any contemporary kitchen and is designed to match the rest of Fisher & Paykel kitchen appliance family.

Easy Installation

This rangehood is the perfect partner to your Fisher & Paykel cooktop. It can be either externally ducted or internally recirculated, making it perfect for apartments.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
