| Height | 67 1/2 " |
| Width | 31 3/32 " |
| Depth | 27 3/8 " |

FEATURES & BENEFITS

Activesmart™ Foodcare

This refrigerator freezer adapts to daily use by cooling and defrosting only when needed. ActiveSmart™ Foodcare technology uses energy efficiently without compromising on food care.

Flexible storage

Adjustable shelves and door storage give you plenty of room to stack and pack all your groceries. Storage bins give you full access inside when they're pulled open and can be easily removed to clean.

Humidity Control

Your fruit and veges need different environments to stay fresh. Humidity control in each storage bin allows you to maintain a microclimate that helps keep food fresher for longer.

Design Quality

Our fridges are designed and built using quality materials. We use real stainless steel on our fridges and solid glass for shelving.

Ice Maker

Fresh ice is always available for you in a dedicated freezer bin. Simply turn it off to free up freezer space or during busy times, you can boost ice production by up to 30%.

Easy Cleaning

No more stubborn dirty marks with our EZKleen feature for stainless steel fridges. Anti-fingerprint coating means you simply wipe clean any marks. Spill-safe secure glass shelves easily capture any drips or leaks.

Easy to use

The SmartTouch control panel has been designed to be intuitive for ease to use, and is conveniently placed near the front of the fridge.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
