

# Heat Pump Dryer, 9kg

Series 7 | Heat pump

White

Better energy efficiency and fabric care with heat pump technology, which dries your clothes at a lower temperature.

- 13 dry cycles, including Wool, Towels and Sports
- 9 Star Energy Rating
- Auto-sensing detects moisture levels to prevent under or over drying
- Wi-Fi enabled giving it the potential to continuously improve and the potential to integrate with smart homes in the future

## DIMENSIONS

Height	850 mm
Width	600 mm
Depth	670 mm

## FEATURES & BENEFITS

### 13 Fabric Care Cycles

Select the right cycle for any fabric type, from the most precious and delicate to those heavier essential items

### Heat Pump Technology

Heat pump technology dries at lower temperatures for gentle fabric care and because moisture is condensed, no venting is required. This is an ideal dryer for laundries where venting is difficult as it can be placed almost anywhere in the home.

### Too Precious To Tumble?

The drying rack is designed for items that can't be tumble dried. It fits easily into the dryer and delivers the perfect result for those precious delicates, shoes and toys.

### Sports Cycle

The low heat Sports cycle is perfect for whatever the game throws at you, and ensures that your gear is ready for the next one.

### Easy-Clean Filter

An additional easy-access and easy-clean condenser filter adds an extra level of protection for capturing lint, preventing build up on the dryer's condensing system and helping to maintain a high level of efficiency.

### Designed To Match

The Heat Pump Condensing Dryer is designed to match beautifully with any Fisher & Paykel front loader washing machine, creating the perfect pair to deliver complete fabric care.

### Wi-Fi Enabled

Your dryer is Wi-Fi enabled, giving it the potential to continuously improve and integrate with smart homes in the future.

## SPECIFICATIONS

### Capacity

Total capacity **9 kg**

### Consumption

Energy rating **9 star**  
 Energy usage **129kWh/year**  
 In-use energy carbon emissions estimate **84.0kgCO2e/year**

**Where applicable:**

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
