- Quick, Sanitise and Extra Dry modifiers provide extra wash options
- Auto option senses the optimum wash cycle for your dishes

DIMENSIONS

Height	820 - 880 mm
Width	598 mm
Depth	574 mm

FEATURES & BENEFITS

Seamless Design

Install this dishwasher flush under your benchtop with the option of a custom kickstrip, ensuring minimal gaps. Designed to match our companion products for a seamless finish in your kitchen.

A Quality Wash

This dishwasher offers seven wash programs including Auto, which automatically senses the optimal wash cycle for your dishes. The three stage filtration system delivers a superior clean, while the rinse aid indicator reminds you to top up for squeaky-clean dishes.

Quick, Sanitise And Extra Dry Options

The Quick wash modifier delivers a faster wash while maintaining performance. The Sanitise option provides extra protection killing 99.9% of bacteria in the final rinse. The Extra Dry setting is perfect for those hard to dry plastic dishes.

Efficient Drying

ThermoDry technology removes moisture from the final hot rinse using natural condensation. The Extra Dry option can be added to selected wash cycles to further boost the drying performance.

Flexible Stacking

Designed to fit 15 place settings, the flexible, adjustable storage lets you stack large items with ease - featuring a full width cutlery tray, height adjustable middle rack, cup holders and wine glass supports.

Quiet & Reliable

Running at a very low decibel rating, this dishwasher does its job without making a fuss. The combination of clever technology and simple mechanics means greater reliability and superior wash performance.

Efficient Performance

This dishwasher delivers a powerful wash that ensures optimal results, with a 4 star energy rating and a 5.5 star water rating. Use the Delay Start option for up to 12 hours.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
