FEATURES & BENEFITS

Combination cooking

Elevate every ingredient with combination steam cooking. By blending dry convection heat with adjustable steam levels, you can preserve the delicate texture of seafood like salmon and snapper, maintain the essential vitamins and minerals in greens, and enhance the rich flavours of prime cuts of meat.

Mastery of temperature

Steam is eight times more efficient at conducting heat than convection, which means our combi steam oven can cook at reduced times and lower temperatures. It perfectly balances steam with convection heat, ensuring exceptional temperature accuracy for perfect roasting and crafting signature dishes.

Preserve flavour and nutrients

Perfect for delicate dishes like snapper or salmon, steam cooking preserves nutrients and texture, offering a healthier way to enjoy meals. With specialised steam functions, including Sous Vide, the combi steam oven brings out the best in every ingredient, ensuring your creations are both nutritious and delicious.

Cook with confidence

Using the large 5" touchscreen interface, you can cook with a favourite method, hero ingredient, cooking function, or recipe. Your oven will guide you through the steps, or change the temperature and heat type automatically, depending on your selection.

Reheat and restore

Revitalise your leftovers with our Steam Regenerate function, ensuring dishes like roast chicken and risotto maintain their freshness and flavour. For that just-baked quality in pastries, bread, and pizza, opt for our Crisp Regenerate setting, which reheats to keep every bite deliciously crispy.

Complementary design

Every detail has been carefully crafted from the finest materials to enhance your kitchen's aesthetic, perfectly suiting your design style. Pair it with a Vacuum Seal Drawer for the ultimate kitchen solution.

Steam clean

Keep your oven spotless with the natural power of steam. The steam clean feature helps tackle stubborn spills, allowing for a quick wipe-down.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
