## Warming Drawer, 30"

Series 9 | Professional

Stainless Steel

Keep plates warm until ready to serve; rapid proof or slow cook. Pair with a Professional-style oven for design cohesion.

- A companion product, designed to match with other Professional style Fisher & Paykel products
- Space to keep 16 standard-sized place settings evenly warm, with accessory rack for optimising space
- · Easy to clean smooth-glass base
- Six versatile tailored programmes for warming, proofing, dehydrating and slow cooking

#### **DIMENSIONS**

Height 10 11/16 "
Width 29 15/16 "
Depth 22 3/8 "

## **FEATURES & BENEFITS**

#### Complementary Design

Our Warming Drawer comes in brushed stainless steel, for seamless pairing with our matching ovens.

#### **Multi-Function Flexibility**

Choose from six tailored functions including Rapid Proof, Dehydrate and Slow Cook.

#### Easy To Clean

Cleaning and care of the Warming Drawer is simple. After each use, just wipe out the smooth glass interior with a damp cloth.

#### Easy To Use

Soft-close with capacitive touch controls, our Warming Drawer comes with an accessory rack for optimising space.

#### **Precise Control**

With fast and even heating, our warming drawer is great for keeping food warm and low temperature cooking, as well as resting after a traditional roast in the oven and proofing dough.

#### Safe And Sound

With Automatic switch-off and Delayed start functionality, our warming drawers help keep dishes warm until it is time to serve the main meal.

Guide d'utilisation FR

User Guide

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
