30" Series 7 Professional 4 Burner Gas Range, Natural Gas

Series 7 | Professional

Stainless Steel | Natural Gas

Professional style and performance, with high power burners delivering high heat or the most gentle simmer.

- Top burner heat of 22,500 BTU, for seriously fast boiling
- Gas oven with 4.6 cu ft total capacity
- Non-tip full-extension shelves in main cavitiy for safe removal of hot dishes

Made from quality materials and real stainless steel

DIMENSIONS

Height	35 3/4 - 36 3/4 "
Width	29 7/8 "
Depth	29 1/8 "

FEATURES & BENEFITS

Cooktop Power

Sealed Dual Flow Burners[™] deliver cooktop power up to 22,500 BTU for seriously fast boiling right down to a precise 140°F full surface simmer with the gentlest of flames.

Cooking Flexibility

The cooktop is designed for easy access to any burner with grates you can smoothly slide pots across. The oven is large enough to hold full size baking sheets.

Design Quality

This range has craftsmanship in every detail, with real stainless steel, cast-iron grates, and titanium coated dials. Each cavity features incandescent lights and full extension telescopic racks. From the robust legs to the powerful cooktop, the Range is built to last.

Easy To Clean

With a continuous, porcelain basepan, cleaning up spills is effortless. Your cooktop simply needs a quick wipe to keep it looking good as new.

Total Control

Precise control across high and low settings is delivered through the halo-illuminated cooktop dials.

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
