All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy

Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy

consumption data multiplied by the carbon emissions factor for

product and model. Under our policy of continuous improvement, these dimensions and specifications may change at any time. You should therefore check with Fisher & Paykel's Customer Care Centre to ensure this page correctly describes the model currently available. © Fisher & Paykel Appliances Ltd 2020
