The wall chimney cooker hood has a Contemporary styling, extracting steam, grease and cooking odours quietly and efficiently.

- With four fan speeds, plus a boost function, select the perfect extraction rate for your cooking
- · Dishwasher-safe filters that are easy to remove and clean
- Wi-Fi enabled for notifications through the SmartHQ™ app

**DIMENSIONS** 

Height 635-1035 mm
Width 598 mm
Depth 500 mm

# **FEATURES & BENEFITS**

#### **Quiet And Effective**

Featuring perimeter extraction, four fan speeds and a boost function, this cooker hood provides powerful extraction to quickly remove odours and steam. Odours can linger in the kitchen well after cooking is finished so the timer keeps the hood working for up to 15 minutes before automatically turning off.

**Simple Controls** 

The intuitive control panel responds to the touch of your finger. LED strip lighting illuminates the entire hob surface for the perfect sear or ideal reduction. Cooker hood settings, including temperature and fan speed, can be controlled via the SmartHQ $^{\text{TM}}$  app, with additional voice control options for fan speeds and lighting.

#### Easy Cleaning

Designed for simple removal, the filters are easy to clean and dishwasher safe, while the glass and stainless steel finish is easily wiped clean. The SmartHQ $^{\text{TM}}$  app will notify you when to clean the filter to ensure you get the best performance out of your cooker hood.

## **Complementary Design**

This wall cooker hood features sleek black glass and stainless steel styling which will complement any contemporary kitchen.

### Easy Installation

This wall chimney cooker hood is the perfect partner to your Fisher & Paykel hob. It can be either externally ducted or internally recirculated, making it perfect for apartments.

#### **SPECIFICATIONS**

#### Accessories (sold separately)

Recirculation carbon filter 792481

#### Consumption

Energy usage 34kWh/year
In-use energy carbon emissions estimate 6.8kgCO2e/year

#### Installation and cleaning

Air outlet size 150 mm

#### Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
