# 90cm Series 9 3 Burner Gas Hob, LPG

| Series 9 | Minima |
|----------|--------|
|----------|--------|

## Black Glass | LPG

A powerful three burner with precision control and performance. Pair with any other appliance in our Minimal range.

- Three burners including two dual wok burners
- A timeless, minimal look to fit any kitchen style, with black ceramic glass cooking zones and a black trim
- A flame-failure safety device; if the flame goes out, the gas turns off

• Removable cast iron trivets and ceramic glass that can be wiped down for easy cleaning

# DIMENSIONS

| Height | 58 mm  |
|--------|--------|
| Width  | 900 mm |
| Depth  | 450 mm |

## **FEATURES & BENEFITS**

## **Complementary Design**

The subtle black glass, anodised trim, and black dials blend elegance with durability and are designed to match the Minimal style Series 9 ovens. With premium styling and detailing, these hobs seamlessly blend with other appliances for a cohesive, considered kitchen design.

## Precise Control

The consistent flame and heat distribution of the dual flame wok burner combined with the highly responsive dials offer precise heat adjustment that can perfect a slow simmer for sauces or an intense heat for searing steaks.

## Easy Cleaning

Cleaning and care of these hobs is easy with sealed burners and a single sheet cooking surface. After each use, simply remove the trivets and wipe down the glass.

## **Quality Materials**

Featuring cast iron trivets, anodised metal dials, and hightemperature resistant ceramic glass, our hobs are built with the finest materials for optimal performance.

Safe & Sound

The flame failure safety device automatically turns off the gas if the flame is accidentally extinguished.

## SPECIFICATIONS

| Accessories (included)        |           |
|-------------------------------|-----------|
| High power wok cooking        |           |

#### Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
